

Software Concepts and Excel Skills

1. Define the term “software” and explain the difference between system software and application software.
2. Identify and describe three primary tasks of an operating system.
3. What is a pivot table in Excel, and what is its primary use?
4. You have a dataset in Excel showing monthly sales figures for different products. How would you use conditional formatting to highlight all sales figures above \$10,000?
