

# Enterprise Service Bus (ESB)

- The Web services are not effectively solve the interconnection of heterogeneous systems.
- Not resolve the communication protocol deviations, i.e. during communication, the protocol offered by the service is different than the protocol used by the client.
- Protocol and message transformation is also possible
  - message routing – based on context and content
  - QoS (Quality of Service) – performance, security, reliability
  - data enrichment – information extension with automatic extra data
