

Integrated Software Systems and Testing

Course Title: Integrated Software Systems and Testing	
Description	This course provides an in-depth exploration of the principles and practices involved in integrating and testing software systems. Students will learn about the challenges and methodologies associated with building reliable, scalable, and interoperable software systems. Through a combination of theoretical concepts and practical exercises, the course covers various integration strategies, and tools essential for modern software development and quality assurance.
Semester	Spring 2024
Neptun code	GEIAL51C-Ma
Instructor	Dr. Károly Nehéz
Credit Hours	4
Attendance Requirement	Students are required to attend at least 60% of the scheduled classes to be eligible for the course signature.
